

CLEVELAND CLINIC JOURNAL OF MEDICINE

VOLUME 58 · NUMBER 2 · MARCH · APRIL 1991

HIGHLIGHTS FROM MEDICAL GRAND ROUNDS

WILLIAM S. WILKE, MD, EDITOR

Ticlopidine: new option for stroke prevention 113

CATHY A. SILA, MD

A new inhibitor of platelet aggregation shows promise in preventing stroke, as well as cardiac events in patients at risk for stroke.

Treating high cholesterol: everyday applications of the national guidelines 114JEFFREY W. OLIN, DO
AND MICHAEL D. CRESSMAN, DO

Patient history and laboratory tests are key to the optimal application of the National Cholesterol Education Program guidelines.

CLINICAL CONSULTATION

A practical approach to chronic fatigue syndrome 116

STEPHEN P. HAYDEN, MD

Psychiatric referral may be the best option for a number of patients with chronic fatigue syndrome.

CONTRIBUTION

Prophylaxis and treatment of post-renal transplant rejection 125DONALD R. STEINMULLER, MD
ERNEST HODGE, MD
CHRISTOPHER BOSHKOS, MD
STEVAN B. STREEM, MD
ANDREW C. NOVICK, MD
AND DAWN BAILEY, RN

Monoclonal preparations offer advantages over polyclonal preparations in the prophylaxis and treatment of post-transplant rejection in renal transplantation.

VANORDSTRAND FESTSCHRIFT

Howard Scott VanOrdstrand, MD (1911-1988) 131

MUZAFFAR AHMAD, MD

A pioneer in beryllium lung disease is remembered.

The many facets of occupational asthma 137

STEPHEN L. DEMETER, MD

Occupational asthma presents a variety of concerns—medical, occupational, and legal.

New perspectives in the imaging of pneumoconioses 143

MOULAY A. MEZIANE, MD

Radiology has responded to the medical and legal challenges of pneumoconioses by providing clinicians with more objective diagnostic information.

TABLE OF CONTENTS

**Evaluating pulmonary impairment:
appropriate use of pulmonary function and
exercise tests** 148

HERBERT P. WIEDEMANN, MD
In occupational lung disease, the physician's first and
primary task is detection and measurement of impairment.

**Immune mechanisms in beryllium lung
disease** 157

SHARAD D. DEODHAR, MD, PHD
AND BARBARA P. BARNA, PHD
Animal investigations support the participation of cellular
immune mechanisms in beryllium lung disease.

Asthma: current strategies for treatment 161

THEODORE F. REISS, MD
AND MUZAFFAR AHMAD, MD
Inhalation therapy with an anti-inflammatory and direct
bronchodilator specifically targets airway inflammation.

RADIOLOGY PATHOLOGY GRAND ROUNDS

MOULAY A. MEZIANE, MD, EDITOR

Left atrial lesion in a 68-year-old 171

CATHRYN POWERS, MD
AND KATHLEEN GLEASON BEAVIS, MD

REVIEWS

**The value of echocardiography in mitral valve
repair** 177

WILLIAM J. STEWART, MD
ERNESTO E. SALCEDO, MD
AND DELOS M. COSGROVE, MD
In patients who require surgery for mitral regurgitation,
valve repair may offer numerous advantages over valve
replacement.

BENCH TO BEDSIDE

BEN H. BROUHARD, MD, EDITOR

**Use of angiotensin-converting enzyme
inhibitors in chronic progressive renal disease** 184

BEN H. BROUHARD, MD
KIMBERLY C. IRWIN, MD
ROBERT J. CUNNINGHAM, MD
AND NICHOLAS T. STOWE, PHD
In chronic renal disease, ACE inhibition may counteract
certain changes that lead to end-stage renal failure.
