REVIEWS

The role of multiple risk factors in cardiovascular morbidity and mortality 211

When more than one risk factor is present, as is often the case, the increase in cardiovascular risk may be synergistic rather than additive.

R. W. GIFFORD, JR

The changing profile of anesthetic practice: an update for internists 219

Advances in anesthesiology over the last decade present new options for internists asked to "clear" patients for surgery.

T. L. HIGGINS

Noninfectious respiratory disease in pregnancy 233

Pregnancy heightens the risk of some noninfectious respiratory conditions. The clinical presentation and management of seven conditions seen in pregnancy are reviewed.

M. J. CLINTON AND M. S. NIEDERMAN

Noninvasive risk assessment after myocardial infarction 245

Assessing risk for cardiac morbidity and mortality after acute myocardial infarction helps to distinguish those who need aggressive management from those who do not. A cost-effective approach is outlined.
