MEDICAL GRAND ROUNDS

Evaluating adrenal incidentalomas 287

Adrenal incidentalomas are detected on approximately 1% to 2% of all abdominal CT scans. The question is, how clinically significant are they?

R.D. DANESE

Building-related illness and sick building syndrome: from the specific to the vague 303

Building-related illness, in which an identifiable factor causes a specific illness, is less common than sick building syndrome, in which there is no identifiable cause for nonspecific symptoms.

E.P. HORVATH

INTERNAL MEDICINE BOARD REVIEW

A 30-year-old woman with headache 293

On the basis of the clinical picture and laboratory data, what is the most likely diagnosis?

F.G. SKOBIERANDA

Adult vaccinations: a short review 311

Recommended use of vaccines against pneumococcal pneumonia, influenza, hepatitis A and B, varicella, measles, mumps, rubella, tetanus, and diphtheria.

J. LONG AND K. KYLLONEN

CLINICAL REVIEWS

Cyclospora: update on an emerging pathogen 299

Cyclospora cayatanensis, an emerging pathogen with worldwide distribution, causes diarrhea in both immunocompetent and HIV-infected patients, and was responsible for a 1996 outbreak in the United States.

T.GUMBO, S.M. GORDON, AND K.A. ADAL

Detecting and preventing ventricular remodeling after MI 319

Infarct expansion after an MI carries a poor prognosis. Thrombolysis prevents early left ventricular dilatation by attenuating infarct expansion. A full-color illustration compares the effects of early reperfusion, late reperfusion, and no reperfusion.

A.D. POPOVIĆ AND J.D. THOMAS

CURRENT DRUG THERAPY

The cosmetic use of alpha-hydroxy acids 327

Alpha-hydroxy acids exfoliate dead skin cells, moisturize the skin, and possibly rejuvenate skin damaged by photoaging.

W.F. BERGFELD

THE CLINICAL PICTURE

The shifting etiologies of lobar hemorrhage 330

Better treatment of hypertension is changing the type of intracranial hemorrhages physicians most often see.

P.B. O'DONOVAN AND C.A. SILA

CANCER DIAGNOSIS AND MANAGEMENT

What primary care physicians should know about the toxicity of cancer chemotherapy 331

Although symptomatic side effects of chemotherapy reduce a patient's quality of life, organ-system effects are potentially more serious.
