INTERNAL MEDICINE BOARD REVIEW

A 68-year-old woman with high serum protein and no symptoms 403

As a result of a routine checkup,
an elevated serum protein is found.
What is the appropriate follow-up and diagnosis?

H. ABDEL-RAZEQ AND B. BOLWELL

CURRENT DRUG THERAPY

Carvedilol for heart failure: Renewed interest in beta blockers 415

The idea of using beta blockers to treat heart
failure seems counterintuitive. But carvedilol
is changing that thinking.

J.B. YOUNG

MEDICAL GRAND ROUNDS

Low back pain: Living with ambiguity 407

Ambiguity is a fact of life in treating acute low
back pain, frustrating physicians and patients alike.

D. MAZANEC

The economics of intensive glycemic control: Is it worth the expense? 410

Is tight control of glucose levels
cost-effective for type I diabetes?
And what about type II diabetes?

R.C. EASTMAN

CLINICAL REVIEWS

The elderly driver: What physicians need to know 423

Objective measures of an elderly driver's
accident risk are lacking, but a simple
assessment of function can provide insights.

K.T. FOLEY

Vascular claudication: How to individualize treatment 429

Clinicians today have a wider variety of options for treating claudication, from medical therapy to angioplasty or surgery.

B.H. GRAY AND T.M. SULLIVAN

Panic disorder in primary care: A cause of unexplained symptoms 437

Many symptoms of panic attacks are physical, making diagnosis difficult and often suggesting another illness.
