

# TABLE OF CONTENTS

## FROM THE EDITOR

### 'Obvious' answers aren't always so simple 487

In atrial fibrillation, rhythm control seemed "obviously" better than rate control—until randomized trials were done. J.D. CLOUGH

## 1-MINUTE CONSULT

### Should primary care physicians screen for depression? 488

Yes, if they have the time and resources to do something about it if they find it. G.E. TESAR

## EDITORIAL

### On testing for proteinuria: Time for a methodical approach 493

It is now imperative that we test for proteinuria in outpatients. G. EKNOYAN

## EDITORIAL

### In-hospital initiation of statins: Taking advantage of the 'teachable moment' 502

For a variety of reasons, starting a statin in the hospital increases long-term compliance. G.C. FONAROW

## MINIMALLY INVASIVE SURGERY UPDATES

### New series: Minimally invasive surgery updates 508

We hope to keep you abreast of how laparoscopic techniques are revolutionizing surgical care, and what this means for your patients. I.S. GILL

## MINIMALLY INVASIVE SURGERY UPDATES

### Laparoscopic repair of giant paraesophageal hernias: An update for internists 511

Laparoscopic repair is safe and can provide excellent results. M. ROSEN AND J. PONSKY

## REVIEW

### Staphylococcus aureus bacteremia: Using echocardiography to guide length of therapy 517

Empiric long-term antibiotic therapy is no longer uniformly recommended for all cases of *S aureus* bacteremia, although experts disagree about the optimal length of therapy. A.I. KIM, K.A. ADAL, AND S.K. SCHMITT

## REVIEW

**Proteinuria: How to evaluate an important finding** 535

Proteinuria should be taken seriously, even in outpatients without symptoms. W. KASHIF, N. SIDDIQI, A.P. DINCER, H.E. DINCER, AND S. HIRSCH

## REVIEW

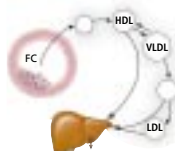

**Withholding nutrition at the end of life: Clinical and ethical issues** 548

The decision to withhold or withdraw enteral or parenteral nutrition at the end of life should be based on medical need, in collaboration with the family and patient, if possible. J. SLOMKA

## REVIEW

**Raising an isolated low HDL-C level: Why, how, and when?** 553

No current therapy is optimal, but many can modestly increase HDL-C. The decision to treat depends on the patient's risk for coronary disease. M. MILLER

## INTERPRETING KEY TRIALS

**The Lescol Intervention Prevention Study: Start all patients on statins early after percutaneous coronary intervention** 561

The trial showed a significant reduction in cardiac events in patients who received a statin drug immediately after a successful percutaneous coronary intervention. Currently, this is seldom done. A.W. MESSERLI, H.D. ARONOW, AND D.L. SPRECHER

## INTERPRETING KEY TRIALS

**Atrial fibrillation: Rate control is as good as rhythm control for some, but not all** 567

Many clinicians are questioning the need to restore or maintain sinus rhythm in atrial fibrillation. What did four recent trials show? M.K. CHUNG

## DEPARTMENTS

**CME Calendar** 534

**Classified advertisements** 574

**Corrections** 501

Osteoporosis in men (Cleve Clin J Med 2003; 70:247–254).  
Preventing kidney failure (Cleve Clin J Med 2003; 70:337–344).

**CME Self-test Online** 575

# UPCOMING FEATURES

- C-reactive protein as a cardiac test
- Pap testing: New methods, guidelines
- Building new bone: PTH for osteoporosis
- Acne: One treatment does not fit all
- New coronary imaging: See the wall, not the lumen
- Are metformin, acarbose weight-loss drugs?
- Epilepsy surgery: Effective, underused
- Contraception update
- Genetic discrimination: The coming dilemma
- Are we winning the war on cancer?
