

# TABLE OF CONTENTS

## FROM THE EDITOR

### Polymyalgia rheumatica: Not well understood, but important to consider 446

Its cause and pathogenesis remain unknown, but it may be accompanied by giant cell arteritis, which must be recognized and treated as a medical emergency.

J.D. CLOUGH

## 1-MINUTE CONSULT

### My patient has elevated prolactin and infertility, but normal periods and a negative pituitary study. What should I do? 457

Prolactin comes in different sizes. We should consider a diagnosis of macroprolactinemia before embarking on a series of potentially unnecessary and expensive tests and treatments.

I.B. ORIJA AND C. FAIMAN

## REVIEW

### The challenge of valvular heart disease: When is it time to operate? 463

Performed too soon, surgery needlessly exposes a patient to operative risks, but inappropriate delay may lead to cardiac damage and worse long-term outcome.

J.P. REGINELLI AND B. GRIFFIN

## CARDIOVASCULAR BOARD REVIEW

### Cardiac sarcoidosis: A cause of infiltrative cardiomyopathy 483

A 52-year-old man is having frequent episodes of ventricular tachycardia. How should he be treated?

R. FASANO, C.M. RIMMERMAN, AND W.A. JABER

## MEDICAL GRAND ROUNDS

### Polymyalgia rheumatica: Clinical presentation is key to diagnosis and treatment 489

Diagnosing polymyalgia rheumatica can be likened to the saying, "If it looks like a duck and quacks like a duck, it probably is a duck."

B.F. MANDELL

## REVIEW

## **Fecal-based DNA assays: A new, noninvasive approach to colorectal cancer screening** 497

Most Americans forgo any kind of colorectal cancer screening, although it is proven to save lives. Fecal-based DNA testing may be an alternative for those who otherwise would not be screened.

V.P. DEENADAYALU AND D.K. REX

## REVIEW

## **An appropriate diagnostic workup for suspected vascular birthmarks** 505

Some birthmarks can represent significant vascular anomalies that require a diagnostic workup and treatment.

O. KONEZ AND P.E. BURROWS

## REVIEW

## **Gynecomastia: Its features, and when and how to treat it** 511

Gynecomastia is common and usually benign, though often distressing. Causes are many.

S.A. BEMBO AND H.E. CARLSON

## PATIENT-ORIENTED EVIDENCE THAT MATTERS (POEMS)

- **Three days of ciprofloxacin is adequate for UTIs in healthy older women** 448
- **Magnets relieve pain in knee osteoarthritis** 449
- **Task Force recommends against routine coronary screening** 453
- **Meat, seafood, and too little dairy are risk factors for gout** 456

## DEPARTMENTS

- CME Calendar** 496
- Classified Advertisements** 518
-  **CME Self-test Online** 519

- The *Cleveland Clinic Journal of Medicine* is peer-reviewed and indexed in *Index Medicus*.

# UPCOMING FEATURES

- How to assess hyponatremia
- Cancer drugs get more specific
- Eat your veggies: DASH diet for hypertension
- Drug-eluting stents: The end of restenosis?
- Fatty liver disease on the rise
- Cancer pain: Measuring the fifth vital sign
- Reducing the use of high-risk drugs in the elderly
- Spontaneous bacterial peritonitis: More common than thought
- The sports physical: How much is enough?
