

UNRESOLVED PROBLEMS IN HEART FAILURE: EDEMA, HYPONATREMIA, AND RENAL INSUFFICIENCY

Supplement 2, Volume 73
June 2006

Supplement Editor

GARY FRANCIS, MD
Cleveland Clinic

Sodium and water retention in heart failure and diuretic therapy: Basic mechanisms	S2
DOMENIC A. SICA, MD	
Acute decompensated heart failure: The cardiorenal syndrome	S8
GARY FRANCIS, MD	
New approaches to detect and manage edema	S14
and renal insufficiency in heart failure	
W.H. WILSON TANG, MD	
Vasopressin receptor antagonists:	S20
Mechanisms of action and potential effects in heart failure	
STEVEN R. GOLDSMITH, MD	
The clinical effects of vasopressin receptor antagonists in heart failure	S24
MIHAI GHEORGHIADE, MD	
Panel discussion	S30

This supplement was supported by an educational grant from:

Otsuka America Pharmaceutical, Inc.

This supplement is based on the complete proceedings of a satellite symposium held in March 2006 prior to the American College of Cardiology (ACC) Annual Scientific Session. The symposium was not part of the official ACC Annual Scientific Session as planned by the Annual Scientific Session Program Committee. Articles in this supplement were developed by the Cleveland Clinic Journal of Medicine staff based on transcripts of faculty presentations at the symposium, and then each article was revised and approved by the respective author/presenter.

Topics and editors for supplements to the *Cleveland Clinic Journal of Medicine* are determined by the *Journal's* editor-in-chief and staff. Supplement editors are chosen for their expertise in the topics discussed and are responsible for the scientific quality of supplements, including the review process. The *Journal* ensures that supplement editors and authors fully disclose any relationships with industry, including the supplement underwriter. For full guidelines on grant-supported supplements to the *Journal*, go to www.ccm.org/pdf/guidelines.pdf.

Author financial conflict-of-interest disclosures appear within the authors' respective articles.
