# TABLE OF CONTENTS

## FROM THE EDITOR

### Influenza: It's right to bare arms 830

As busy as we are, it is worth spending extra time to aggressively promote immunization to our patients, our staff, and ourselves.

B.F. MANDELL

## COMMENTARY

### A medical center is not a hospital: Reflections of a department chair still in the game 832

Dr. Thomas Lansdale's commentary in the September issue resonated with many physicians because he so eloquently captured the increasing frustration that many physicians feel.

D.L. LONGWORTH

## THE CLINICAL PICTURE

### Black hairy tongue 847

A 71-year-old man presents for evaluation of an asymptomatic black discoloration of the tongue. What is the most likely diagnosis?

S. VAÑO-GALVÁN AND P. JAÉN

## REVIEW

### Carcinoid tumors: What should increase our suspicion? 849

Patients often present with vague, nonspecific symptoms, and unless the primary care physician suspects that the patient has a carcinoid tumor, the appropriate testing is seldom ordered.

G. AGGARWAL, K. OBIDEEN, AND M. WEHBI

## REVIEW

### Parkinson disease: Not just a movement disorder 856

Nonmotor symptoms—sensory, autonomic, and behavioral—are common and important to recognize, as they can lead to even more serious complications and impair quality of life.

M. PANDYA, C.S. KUBU, AND M.L. GIROUX

CONTINUED FROM PAGE 827

REVIEW

**2008–2009 Influenza update:  
A better vaccine match**

865

Last flu season, some people may have lost their faith in flu shots. In the 2008–2009 flu season, we hope to do better.

S.B. MOSSAD

REVIEW

**Bisphosphonates and osteonecrosis of the jaw:  
Innocent association or significant risk?**

871

A cause-and-effect relationship has not been established, and most of the reported cases have been in patients with cancer who were receiving much higher doses than those used in osteoporosis or Paget disease of the bone.

J.J. CAREY AND L. PALOMO

REVIEW

**Hepatitis B virus infection:  
Understanding its epidemiology,  
course, and diagnosis**

881

Internists should be aware of the natural history of hepatitis B virus infection, a vital prerequisite to assessing disease severity and determining the need for antiviral therapy.

H.M. ELGOUHARI, T.I. ABU-RAJAB TAMIMI, AND W.D. CAREY

DEPARTMENTS

**Letters to the editor**

**A medical center is not a hospital: More letters**

838

Comments on Dr. Thomas Lansdale's provocative essay in the September 2008 issue.

**CME Calendar**

870

**Correction**

894

**Index to Volume 75**

890

**CME Self-test Online**

895

To receive CME credit, read the selected articles in this issue and then go online to take the test. It should take about 1 hour and 30 minutes to complete this activity.

Release date: Dec. 1, 2008. Expiration date: Nov. 30, 2009.

# UPCOMING FEATURES

- **The JUPITER trial:  
Should more patients  
get statins?**
- **Time for improvement  
in Alzheimer disease**
- **Who should receive  
the shingles vaccine?**
- **Depression and the heart:  
What we know,  
and where we're headed**
- **When are anticoagulants  
safe in pregnancy?**
- **Cancer and clots:  
All VTE is not the same**
- **What workup for  
a palpable breast mass?**
