The role of hyperuricemia and gout in kidney and cardiovascular diseaseS13

N. Lawrence Edwards, MD

The gout diagnosisS17

Robin K. Dore, MD

The practical management of goutS22

H. Ralph Schumacher, Jr, MD, and Lan X. Chen, MD, PhD

This supplement is based on the proceedings of a symposium, "The Hyperuricemia and Gout Summit," held October 5, 2007, in Scottsdale, Ariz. All faculty presentations at the symposium were developed by the presenting physicians themselves. The symposium was organized logistically by Fallon Medica LLC, a medical communication company. Fallon Medica transcribed audio recordings of the symposium presentations and forwarded the transcripts to the respective physician presenters, who developed the transcripts into the articles published here without assistance from undeclared contributors. All but one of the articles underwent formatting and nonsubstantive copyediting by Fallon prior to submission to *Cleveland Clinic Journal of Medicine*. The *Journal* had all articles peer reviewed to ensure independence and freedom from bias.

This supplement and the symposium on which it is based were supported by educational grants from TAP Pharmaceutical Products Inc.

Topics and editors of supplements to the *Cleveland Clinic Journal of Medicine* are determined by the *Journal's* editor-in-chief and staff. Supplement editors are chosen for their expertise in the topics discussed and are responsible for the scientific quality of supplements, including the review process. The *Journal* ensures that supplement editors and authors fully disclose any relationships with industry, including the supplement underwriter. For complete guidelines on grant-supported supplements to the *Journal*, please visit www.ccjm.org/instructions_grant-supported_supplements.asp.
