

TABLE OF CONTENTS

FROM THE EDITOR

Vaccination: An option not to be ignored 151

Outbreaks of measles are seemingly on the rise, mainly because of lower vaccination rates, which are in part due to the unfounded fear that the vaccine causes autism.

B.F. MANDELL

CME CREDIT INTERPRETING KEY TRIALS

Treating silent reflux disease does not improve poorly controlled asthma 155

A recent multicenter trial indicated that empirically prescribing a proton pump inhibitor does not help control asthma symptoms and that current guidelines need to be reevaluated.

B.P. RISCILI, J.P. PARSONS, AND J.G. MASTRONARDE

EDITORIAL

Stenting for atherosclerotic renal artery stenosis: One poorly designed trial after another 164

The three randomized trials of stenting vs medical therapy published so far are so seriously flawed that it is impossible to make treatment decisions based on their results.

M.D. WEINBERG AND J.W. OLIN

REVIEW

Stenting atherosclerotic renal arteries: Time to be less aggressive 178

It is time to strongly reconsider the current aggressive approach to revascularization of stenotic renal arteries and to take a more coordinated, critical approach.

J.F. SIMON

INTERPRETING KEY TRIALS

Interpreting the JUPITER trial: Statins can prevent VTE, but more study is needed 191

The incidence of venous thromboembolism in people taking rosuvastatin (Crestor) 20 mg/day was about half that in people taking placebo. This was a relatively healthy population, and the incidence in both groups was low.

A. PEREZ AND J.R. BARTHOLOMEW

EDITORS' FINANCIAL DISCLOSURES

Cleveland Clinic Journal of Medicine's chief physician editors disclose the following financial relationships that may be relevant to their editorial roles: Dr. Brian F. Mandell (editor-in-chief) reports that he has received fees for consulting and speaking (CME lectures) from Takeda Pharmaceuticals, was a paid independent contractor (clinical trials) for Savient Pharmaceuticals, and consulted for UPL Pharma. He also serves as section editor (rheumatology and immunology) for The Merck Manual. Dr. Timothy Gilligan (deputy editor) reports no relevant financial relationships.

When and how to evaluate mildly elevated liver enzymes in apparently healthy patients

Not all asymptomatic people with a mildly elevated liver enzyme value need an extensive evaluation, which can be costly, anxiety-provoking, and risky.

G. ARAGON AND Z.M. YOUNOSSI

THE CLINICAL PICTURE..... 205

Palpable purpura

A healthy 47-year-old woman presents with a 3-day history of widespread asymptomatic lesions in the extremities, fever, arthralgias, and mild abdominal pain. What is the diagnosis?

S. ARIAS-SANTIAGO, J. ANEIRO-S-FERNÁNDEZ, M.S. GIRÓN-PIETO, M.A. FERNÁNDEZ-PUGNAIRE, AND R. NARANJO-SINTES

REVIEW 207

Measles: Not just a childhood rash

Outbreaks continue to be reported in communities with a high number of unvaccinated people. Most cases are linked to international travel.

C. SABELLA

Corrections

Errors appeared in Ioachimescu OC, Stoller JK. Diffuse alveolar hemorrhage: diagnosing it and finding the cause. *Cleve Clin J Med* 2008; 74:258–280, and in Samplaski MK, Irwin BH, Desai M. Less-invasive ways to remove stones from the kidneys and ureters. *Cleve Clin J Med* 2009; 76:592–598.

About our online CME self-test 215

To receive CME credit, read any or all of the CME-certified articles in this issue (those that carry the CME logo), then go to www.ccjm.org to take the test for the article or articles you select. It should take up to 1 hour to complete the activity for each article.

Release date: March 1, 2010

Expiration date: February 28, 2011

UPCOMING FEATURES

- Breaking the cycle of medication overuse headache
- Preventing and treating orthostatic hypotension: As easy as A, B, C
- Vaccine update
- Reducing the risks of foreign travel
- Should patients with mild asthma use inhaled steroids?
- MAO inhibitors: A second look
- Laryngopharyngeal reflux: More questions than answers
- When should amylase and lipase levels be repeated in acute pancreatitis?
