FROM THE EDITOR

There is more to the TSH than a number

77

85

87

89

Management of subclinical hypothyroidism should be nuanced and based on clinical and laboratory parameters. B.F. MANDELL

THE CLINICAL PICTURE.....

Aleukemic leukemia cutis

An 85-year-old man presented with rapidly progressive nodules on the scalp, neck, trunk, and extremities.

T.N. ABRAHAM, P. MORAWIECKI, A. FLISCHEL, AND B. AGRAWAL

THE CLINICAL PICTURE.....

Dancing sternal wires: A radiologic sign of sternal dehiscence

Loose fragments of bone and wire pose a danger of puncturing the heart, making sternal dehiscence a surgical emergency.

M.M. GAD AND A. GUPTA

1-MINUTE CONSULT

Repeating blood cultures after initial bacteremia: When and how often?

Repeating blood cultures after an initial positive result is superfluous except in certain situations.

A. MUSHTAQ, B.X. BREDELL, AND A.O. SOUBANI

Follow-up blood cultures are often needed 93 after bacteremia

Without follow-up cultures, the adequacy of treatment can be difficult to assess.

M. TUNGSIRIPAT
