

# TABLE OF CONTENTS

**FROM THE EDITOR**

- Trying to get ahead of Alzheimer disease** **517**

Sorting out patients destined to have Alzheimer disease remains a challenge.

Brian F. Mandell, MD, PhD

**COVID-19 CURBSIDE CONSULTS**

- SARS-CoV-2 and myocardial injury: Few answers, many questions** **521**

What is the mechanism? Is this a distinct population? What are the treatment options?

Paul C. Cremer, MD

**COVID-19 CURBSIDE CONSULTS**

- Management of patients with COVID-19 in the MICU** **526**

The main goals are to ensure caregiver safety and provide the highest quality care.

Chao Ping Wu, MD; Mani Latifi, MD; Eduardo Mireles-Cabodevila, MD

**THE CLINICAL PICTURE**

- 5-Fluorouracil-induced encephalopathy** **532**

A woman on chemotherapy for rectal cancer presents with mental status changes.

Yudai Yano, MD; Akira Kuriyama, MD, MPH

**THE CLINICAL PICTURE**

- Polypoid melanoma mistaken for verruca vulgaris** **534**

Polypoid melanoma is highly aggressive and often misdiagnosed.

Andrea Tan, MD; Daniel Gutierrez, MD; Nooshin K. Brinster, MD; Jennifer A. Stein, MD, PhD

**COMMENTARY**

- Emerging blood-based biomarkers for Alzheimer disease** **537**

A blood test for Alzheimer disease could help in drug development and patient care.

Lynn M. Bekris, PhD; James B. Leverenz, MD

**1-MINUTE CONSULT**

- Should women with HPV-related noncervical cancers be considered at high risk for cervical cancer?** **541**

Yes. Lacking guidelines, close surveillance is prudent.

Suneela Vegunta, MD; Margaret E. Long, MD

**EDITORIAL**

- The HPV vaccine: Understanding and addressing barriers to vaccination** **545**

Key steps include optimizing clinician-patient communication.

Pelin Batur, MD
