An unexpected turn

In the July 2022 issue, an error appeared in Ganeshan S, Kelemen B, Dhaliwal G, Zier L. An unexpected turn: A 71-year-old man with myocardial infarction. Cleve Clin J Med 2022;89(7):401–407. doi:10.3949/ccjm.89a.21030. The arrows in Figure 3 were incorrectly placed. The correct figure appears below:

Figure 3. On repeat electrocardiography 48 hours after presentation, the ST-segment elevations in leads II, III, and aVF were still present. The ST-segment depressions in aVL and V_1-V_3 had resolved, and new ST-segment elevations were present in V_4 and V_5 (arrows).

This is now correct on ccim.org.
