## FROM THE EDITOR .....

### **Pursuing the diagnosis of low back pain 334**

The recommended conservative approach eschewing initial imaging in patients with acute or subacute low back pain is unlikely to miss a significant clinical problem in those with no “red flags,” though the evaluation should be tempered in patients with chronic low back pain.

Brian F. Mandell, MD, PhD

## THE CLINICAL PICTURE.....

### **Low back pain: Spondylitis? 339**

A 37-year-old woman was referred to a rheumatology clinic due to symptoms concerning for spondylitis after noting intermittent back pain with right-sided groin pain.

Aditi Patel, MD; Jean Schils, MD

## 1-MINUTE CONSULT .....

### **Should an NPO order be placed for my patient with acute pancreatitis? 341**

Resting the pancreas with extended periods of nothing by mouth status or total parenteral nutrition is no longer considered the standard of care.

Aaron Pathak, BA; Siena Blackwell, BSN; Robert Jay Sealock, MD

## SYMPTOMS TO DIAGNOSIS .....

### **A hidden cause of hypokalemia 345**

A 21-year-old man presented with increasing fatigue and psychosis symptoms. Laboratory testing results were consistent with a metabolic disorder.

Kanza Haq, MD; Zein Alabdin Hannouneh, MD; C. Elena Cervantes, MD; Mohamad Hanouneh, MD
