CORRECTION

Subclinical hypothyroidism

FEBRUARY 2019

In Azim S, Nasr C, “Subclinical hypothyroidism: When to treat,” *Cleve Clin J Med* 2019; 86(2):101–110, on page 103, in the section “Subclinical hypothyroidism can resolve or progress,” the sentence “The

rate of progression to overt hypothyroidism is estimated to be 33% to 35% over 10 to 20 years of follow-up” contained an error. The correct rate of progression is 33% to 55%. This error has been corrected online.
